

NATURALLY TENDER.

Highland Beef is versatile, tender
and deliciously memorable.

HERITAGE. HISTORY. HIGHLAND.

Today's Highland Cattle are the result of over 14 centuries of natural selection in the extreme environment of Northern Scotland. This heritage breed is a natural forager, that thrives

on diverse terrain all across our country. Highland Cattle are easily recognized by their majestic horns and shaggy coats of long hair.

The American Highland Cattle Association (AHCA) is dedicated to preserving the integrity of the breed, maintaining an American breed registry and assisting its members in creating value with their animals.
